## Great Books of the Western World

- 60 volumes
- 37,844 pages
- 24 million words
- 517 classics by 130 authors,
- Covers 30 centuries of human thought
- Subject categories: Literature, History, Philosophy, and Science

**The ideas, stories, and discoveries that shaped modern civilization ...**

**Information... Knowledge... Understanding... Wisdom...**

From the ancient classics to the masterpieces of the 20th century, the *Great Books* are all the introduction you'll ever need to the ideas, stories and discoveries that have shaped modern civilization. This collection of 517 classics in 60 beautifully bound volumes is colour-coded into four subject categories: literature, history, philosophy, and science. And since this edition includes works from 20th century authors, it's the most up-to-date collection of the *Great Books* ever.

### **Volume Details**

Volumes 1 and 2 of this collection is the *Syntopicon*, a unique two-volume guide that enables you to investigate a particular idea and compare what different authors have to say about it. The *Syntopicon* comprises a new kind of reference work – accomplishing for ideas what the dictionary accomplishes for words and the encyclopaedia accomplishes for facts. Also included is the *Great Conversation*, featuring fascinating background information, extensive timelines, photos, and quotes from the classic works and their authors.

### **Colour Coding**

Special colours on the *Great Books*' spines guide you quickly to the four subject areas

## Britannica Encyclopedia of Art and Artists

### A Comprehensive Encyclopedia covering the History of Art and Artists

Encyclopaedia Britannica presents an exciting 9 volume set covering an array of visual art topics from the Renaissance to today's Modern Art. Vibrant images accentuate articles such as biographies of Pablo Picasso and Frida Kahlo and art movements on Photo Surrealism and Cubism. The many forms of art, from different cultures, are examined at great length in the 54 chapters that make up the majority of the first five volumes. Each work has been written by a specialist, in that particular field, and produced in chronological order so you can enjoy a journey through the ages of art. The second section comprises 4 volumes exploring Artists from 1100 right up to the year 2000 by providing an alphabetically arranged biographical dictionary.

These spectacular volumes are not just for art enthusiasts, but for anyone who enjoys looking at beautiful paintings and learning more about the art world.

#### What you can discover in the *Britannica Encyclopedia of Art:*

**Volume 1** — Includes art from the Paleolithic; Neolithic; Egyptian; Ancient Near Eastern; Bronze and Iron Age; Aegean; Archaic Greek; Classical Greek; Hellenistic and Etruscan Art.

**Volume 2** — Roman; Celtic; Parthian and Sassanian; Steppe; Indian; Southeast Asian; Chinese and Korean; Japanese and Early Christian Art.

**Volume 3** — Byzantine; Irish; Anglo Saxon; Viking; Islamic; Pre-Columbian; North American Indian and Inuit; African; Oceanic; Carolingian and Ottoman Art.

**Volume 4** — Romanesque; Gothic; The Survival of Antiquity; Renaissance Style; The Northern Renaissance; Mannerism; The Baroque; The Rococo; Neoclassicism and Romanticism.

**Volume 5** — Realism; Impressionism; Post-Impressionism; Symbolism and Art Nouveau; Fauvism and Expressionism; Cubism and Futurism; Abstract Art; Dada and Surrealism; International Style; Latin American; Modern American; European Since World War II; Australian and South African Art; plus Glossary and Index.

## New Views of the Solar System

Answers all your questions about our changing solar system

When the International Astronomical Union recently redefined the term "planet," Pluto was stripped of its designation as the solar system's ninth planet. *New Views of the Solar System* looks at scientists' changing perspectives on the solar system, with articles on Pluto, the eight chief planets, and dwarf planets that illustrate this "new view." Brilliant photos and drawings showcase the planets, asteroids, comets, and more, providing a stunning collection of vivid and detailed images of the solar system.
